A NOTE FROM THE CHAIR

Dear Drexel 100 members,

The Drexel 100 has traditionally honored those alumni whose success reflects well on the University. In recent years, this has become more of a two-way street. Under the leadership of President John Fry, major accomplishments at Drexel are adding up at a remarkable rate, leading to enhanced recognition to both the university and alumni.

We can be especially proud of these noteworthy achievements:

• In the fall of 2011, Drexel admitted the most academically qualified freshman class in the University's history.
• In 2011, the University had four Fulbright Scholars, the most in Drexel's history.
• Drexel University's patent portfolio has grown to 225, with nearly a quarter of those issued in just the past two years.
• Drexel's affiliation with the Academy of Natural Sciences, a world leader in biodiversity and environmental research and America's oldest natural history museum, greatly expanded our research and education portfolio.
• Team Drexel Dragons won the U.S. Championship in their category at Microsoft's Imagine Cup Competition for “MathDash,” a game to teach elementary school students arithmetic. They went on to win first place in the “Phone” category for game design at the world championship in Sydney, Australia in July.

Obviously, there will be no shortage of remarkable alumni suitable for induction into the Drexel 100 in the future! As for the 2013 class of Drexel 100, please plan to join us in Philadelphia for the next induction ceremony on Saturday, May 4, 2013. You can use the nomination form on page 2 of this newsletter to recommend candidates.

Finally, I hope you will enjoy catching up on the news about your fellow Drexel 100 members contained in these pages. If you have thoughts on how we can improve the Drexel 100, please send me a note in care of Drexel’s Office of Institutional Advancement or via email at r-lee@uchicago.edu. Your encouragement is valuable.

Sincerely,

Raphael C. Lee ’75, MD, ScD, DSc (Hon.), FACS
Chair, The Drexel 100

New Strategic Plan and Campus Master Plan Envision Drexel’s Future
Roundtables Planned Across the Country to Gather Input for Implementation

More than a year’s worth of work by students, faculty, professional staff, alumni, friends, parents, and community members has produced a new blueprint for the University’s path forward. Entitled Transforming the Modern University: Drexel University Strategic Plan 2012-2017, the document seeks to take advantage of Drexel’s rapid growth of the past two decades to chart exciting new directions for our expanded capabilities. The key themes of the Strategic Plan include:

• One University—Always be more than sum of our parts and operate as a fully integrated institution.
• Co-operative Education—Become the world’s pre-eminent co-operative education provider.
• Online and Hybrid Education—Expand and scale high-quality online offerings and become the premier provider of hybrid academic programs (in-person and online) throughout the United States and globally.
• Innovation neighborhood—Develop a mixed-use neighborhood that brings together education,

Remaking the Drexel Campus

If you haven’t been back to the Drexel campus in a while, you’ll be delighted to see the ongoing transformation. Construction is currently underway on the new home for the LeBow College of Business at 32nd and Market streets. Our “Topping Out” ceremony on August 21st (photo at right) saw the placement of the final beam as Drexel University President John A. Fry, Drexel University Board Chairman Richard Greenawalt and Interim LeBow College of Business Dean Frank Linnehan shared thoughts and then lead attendees in a toast. Meanwhile, renovation of the URBN Center continues. Robert Venturi’s landmark building at 35th and Market will house the Antoinette Westphal College of Media Arts & Design this September.

Drexel also has partnered with the private developer American Campus Communities to build more than 360,000 square feet of student housing, offices and retail space, filling in the footprint of the Creese Student Center along Chestnut Street between 32nd and 33rd streets. The $97.6 million project is the first step in the development of a new gateway to Drexel and University City.

This partnership will serve as a model for future plans to reimagine areas such as the Lancaster Avenue corridor near 34th Street and, eventually, the prime undeveloped property the University owns on JFK Boulevard across from one of America’s premier transportation hubs, 30th Street Station.
His career in the NBA blossomed immediately after graduating with All-American honors from Drexel, when the Charlotte Hornets drafted him in the second round. He was only the second Dragon in history to play in the NBA, after Michael Anderson in ’88.

After one season he was traded to the San Antonio Spurs, where he was given a real chance to shine on the court. After helping the Spurs win the NBA Championship in ’99 and ’03, Malik went on to play for the New York Knicks and finally the Oklahoma City Thunder.

When Malik started working in broadcasting in San Antonio, the Spurs director of broadcasting told InsideHoops.com, “I have always thought Malik would make a great basketball analyst. He always provided terrific insight in interviews and his reception with Spurs fans has been off the charts since he stepped into town.”

“It’s awesome. I love working with Marc, and it’s a dream come true to be back in Philly,” Malik said.
Drexel 100 Members in the News

Floss Barber '75 was highlighted in the “CEO File” in the Philadelphia Business Journal.

George Campbell, Jr., PhD '68, HD '00 was elected to the Board of Trustees of MITRE, a not-for-profit organization chartered to work in the public interest.
